2017,2016
- ARCH465 Architectural Structure II (3 credits)
Required: undergraduate and graduate first professional degree candidate.
- Building upon what student learned in previous course on construction, structure and tectonics, Structure II has two goals. The first is to teach students the basic of structural engineering on three most common structure systems: wood, steel and concrete. The second and most important goal is to give students the knowledge and skills they need to take control of the structure in their architectural endeavors.
